Earned Value Management Central Repository

21.3 October Release Items

10/27/2021

1 Summary

Below are the included items in the October Release of the API, Auth, CR, External API, NG, Portal, and Web Services applications.

- Updated contracts grid (Search Contracts, Upload Home, Reviewer Home) to include Prime/Sub contractor information.
- Submission Detail updated to include Submitted Date
- Added As of Date to Gold Card and added RCR header on Contract Detail page
- Updated Contract Detail Charts to include Contract Start and Contract End Date
- Added new user email that includes link to IPM Events Calendar
- Updated to .NET 4.8 framework
- Updated to latest version of Bootstrap
- Updated to latest version of JQuery
- Updated to latest version of Font Awesome
- Several STIG requirements met (recommendations).
- Multiple bug fixes across all applications.

2 Site Changes

The primary changes in this release were related to updates with the External API site and adding additional charting to the NG app. Other changes were made in an increased effort to address specific bug fixes and efficiency issues.

Auth

Modified language on Change Password page to match STIG requirements.

Fixed a routing bug with the Reset Password link.

Added direct endpoint for token call for External APIs. Added test page for this as well.

CR

Blocked the ability to remove the only Reporting Stream on an Effort.

Adjusted the behavior of the visibility of the Data Views and Charts button on Contract Detail.

Fixed typo in Submission Status Change Request email.

Fixed some display issues with the Effort control on Contract Detail which occurred when Component Efforts were deleted.

Adjusted the export for IPMR Cost Report to deal with a display issue.

Added Startup and Shutdown messages (STIG requirement V-222469).

Update to .NET 4.8 Framework.

Updated Font Awesome to the latest version.

Updated jQuery and jQuery UI to latest version.

Updated Bootstrap to latest version.

Updated the results grid on Search Contracts to include Prime/Sub contractor reference.

Updated Submission Detail header information to include Submitted Date.

Removed Manage Lists (remaining list moved to Portal).

- Adjusted file display in the Manage Efforts page.
- Fixed broken RCR links in the Cost squares on popups.
- Fixed the Manage Submission File Packages 'Network Error'.
- Remove Program Administration page (deprecated).
- Added Reporting Compliance Report label above the chart on Contract Detail.
- Added As of Date to the Gold Card Metrics on Contract Detail.
- Fixed the Data Quality 4MB file limitation.
- Updated a final report to export to FlexCel.

External API

- Updated references for certificate handling.

NG

- Update multiple outdated NG modules.
- Adjusted landing behavior on Data Views and Charts page to only land on efforts with IPMR data.
- Adjusted transition between .NET and NG applications.
- Adjustments made to several charts and displays to include various date fields.
- Updated columns on the Help Desk grids and exports to improve readability.
- Removed ability to assign Help Desk tickets to 'All'.
- Fixed the Data Quality 4MB file limitation.

Portal

- Script Report Organization NDAs For EVM adjusted for misleading results.
- Fixed a bug on Contract Detail where inactive list items were appearing in the lists.
- Fixed non-responsive behavior on first search attempt on Search Programs page.
- Fixed an issue on the NDA Organization section where expired NDAs were displayed when they should not be.
- Fixed some display issues on Contract Request Manager.
- Added Startup and Shutdown messages (STIG requirement V-222469).
- Log every configuration change (STIG requirement V-222512).
- Added Previous Login Date in portal (STIG requirement 222437).
- Update to .NET 4.8 Framework.
- Updated Font Awesome to the latest version.
- Updated jQuery and jQuery UI to latest version.
- Added a New User email to include training information.
- Updated Renewal Email to include training information.
- Updated signature on all emails to read IPM Support Team.
- Fixed Subcontractor bug on Contract Request page.
- Updated Bootstrap to latest version.
- Fixed a display issue on Contract Detail involving the Subprogram entry.
- Hid the 'Reports to EVM' from all pages in Portal. Set to True by default (remnant of migration).
- Removed the Manage Prime Contract Reference page (deprecated).
- Updated the work flow for adding a Contract to the system.

Blocked users from deactivating Contractors and Divisions that are associated with an active contract.
Fixed an issue with Subprograms where 0 would get stored into the database and create referential issues.

Web Services Admin

Added Startup and Shutdown messages (STIG requirement V-222469).
Update to .NET 4.8 Framework.

Web Services Host

Added Startup and Shutdown messages (STIG requirement V-222469).
Update to .NET 4.8 Framework.

3 DB Changes

There were changes made to the DCARCPortal, DCARCReporting, and EVM Databases.

- The changes made were mostly to stored procedures, with a few schema changes.

4 Service Changes

This release also included changes to the WinService, see below:

WinService

Update to configuration only.
